

PROJECT MANAGEMENT PROFESSIONAL (PMP) COURSE

OVERVIEW

The Project Management Professional (PMP®) is an acclaimed professional certification for project practitioners. Designed for those with extensive project experience, the PMP® demonstrates your understanding of the fundamental and application knowledge, terminology and best practice processes of successful project management. The PMBoK 6th Edition compared to the PMBoK of previous editions has a clear emphasis on adaptive or agile models in addition to the traditional and predictive waterfall model. If you are already serving as a subject matter expert in project teams, or you are looking forward to project management career advancement, the PMP® can get your career on the right path or take it to the next level

WHO SHOULD ATTEND

- Skilled project managers, project team members and those interested in project management best practices who have already attained 4,500 hours or more project management experience required to take the PMP® examination
