

RELIABILITY CENTERED MAINTENANCE

OVERVIEW

Learn and understand wear patterns, causes and costs associated with wear at different stages of component life cycle.

TARGET MARKET

RCM is a Team activity, specially designed for :-

- Maintenance Managers / Equipment Engineers.
- Equipment Supervisors
- PM Technicians.
- Senior Technicians
- Technical Specialist

COURSE OUTLINE

- Maintenance Overview RCM Terminology (What makes RCM different)
- System Selection for RCM Analysis Failure Mode Effect Criticality
- Analysis (FMECA)
- Failure Classification
- System Block Diagram for Model Machine

OBJECTIVES

At the end of the workshop, participants will be able to:

- Compliance with SAE JA1011 and AIAG standards failure classification.
- Identify Functions and Potential Functional Failures.
- Identify and Evaluate (Categorize) the Effects of Failure.
- Evaluate and select Maintenance Tasks.
- Develop maintenance standard for predictable and reliable performance.
