

VISUAL CONTROLS ENABLE SUCCESS!

In today's fast-paced workplace people want to feel safe and know what is going on without having to find a manager to ask. Visual Controls can make that happen while keeping managers up-to-date without having to chase after workers to find out what is going on. Learn how to use manual, digital, and electronic Visual Controls to provide information that will make the workplace more efficient, more productive, and a safer place to work

Objectives

Learn the three basic principles for developing Visual Controls that will increase production, reduce scrap and defects, and provide a safer place to work.

Hope to build and display Visual Controls for :

- Work Instruction and Standard Operating Procedures
- Material Movement and Storage
- Production and Service Centers
- Machinery and Equipment
- data Collection and Offices
